Teaching & Public Outreach

Undergraduate Education & Mentoring

- Developed a free interactive Wright-Fisher simulator for population genetics labs: <https://cjbattey.shinyapps.io/driftR/>
 - Used in undergraduate classes at U. Washington (BIOL340 & BIOL476), U. Wyoming, UC Davis, and Kenyon College.

- Designed assignment and teaching modules for Biological Impacts of Climate Change (BIOL 315, UW Seattle), based on students' independent analyses of data from peer-reviewed studies.
- Mentored an undergraduate student on her study of reticulate evolution in the Great-Tailed Grackle (presented at the American Ornithologists' Union Conference, 2014).
- Collaborated with labmates to develop a 3-hr introduction to museum-based science for Introductory Biology (Biol 180) classes. Over 2000 students have since participated.

Seattle Audubon Society

- Worked with Seattle Audubon staff and volunteers to analyze 17 years of citizen-science point count data to assess impacts of restoration projects on avian communities in city parks.
- Presented results at Seattle Parks stakeholders' meeting and three public Audubon meetings.
- Results helped convince parks to adjust maintenance schedules impacting Savannah Sparrows at Discovery Park, and lead to a boost in volunteers in following years.

Burke Museum of Natural History

- Volunteer presenter and guide for public tours and events at the Burke Museum.
- Developed hummingbird/sunbird convergent evolution display for "Birds at the Burke".
- Ornithology collecting trips in WA, ID, MT, CO, and the Sierra Madre Occidental (MX).
- Weekly preparation of biological specimens (2013-present).

Contributions to the Field

- Peer Reviewer: *J. Biogeography*, *PLOS one*, *Molecular Phylogenetics and Evolution*, *Molecular Ecology*, *Molecular Ecology Resources*, *Nature Scientific Reports*, *The American Naturalist*
- R and shell scripts for visualization of RAD sequence data and bioinformatics processing (github.com/cjbattey)
